TO: Wildwood Lot Owners Association member,

RE: Missouri Department of Natural Resources (MDNR) update

RE: member "Not in good standing resolution"

The Board of Directors has recently finalized a large portion of our agreement with MDNR, with the assistance of our attorney and engineer.

Attached please find a chronological timeline prepared by our engineer. This includes due dates, work to be completed, permits needed and an approximate cost of each stage. Please also find attached, the Wildwood Lot Owners Association Holding Tank Management Plan.

Most of this work will be organized by our maintenance manager and our waste water manager.

Please note, if a lot owner has a holding tank, a tank level indicator must be installed by June 30, 2018. This will be each lot owner's responsibility if you have a holding tank. You will need to contact Lonnie Wyman for a quote if you would like Wildwood to install this for you. If you plan to install the indicator yourself, please contact Lonnie to communicate your plan for installation, location of indicator light etc. The tank level indicator approved is approximately \$200.00 plus labor and misc. parts, if applicable. This approved tank level indicator is the only one that can be used and Wildwood will keep these in inventory as needed.

Enclosed is also a "member not in good standing" resolution effective May 2017.

Respectfully,  

Wildwood Lot Owners Association Board of Directors
