Board & Park Council meet the **2nd Saturday of every month**. Park Council meetings begin at 8:30am at the Clubhouse. Everyone is welcome to attend. The Board joins Park Council meetings at 10:00am.

Beginning with the December meeting, the Board will be remaining in the clubhouse for the second half of their meeting. Lot owners are invited to observe.

This is *not* a question & answer meeting.

In addition to the Board & Council meetings, there are semi-annual Lot Owner's meetings. These meetings are held on the **2nd Saturday of May and October** each year.

Attending these meeting is a great way for Lot Owners to stay on top of what's happening in the park.

**THANKS to Michelle Liebach
for organizing!**

Thanks!!

If you see Larry & Dee Newman out and about in the park, be sure to give them a HUGE thank you for all that they've done with the Park Activities this year. We have had some amazing times this year thanks to the hard work they've put in.

A big thank you to all the volunteers who have helped make these activities possible. Without volunteers, all of the Social Committee's plans couldn't become reality.

A big thank you to Fred Jones for stepping in to help with the music when we had some other options cancel.

Autumn In The Woods!

November PC & BOD meetings to be held on November 3rd instead of 10th to avoid messing with opening day of Deer Season.

All are welcome to attend Park Council. New Committee Chairs & Co-Chairs will be elected.

BASICS of Winterizing Your Camper With An Air Compressor

It's that time of year when we start thinking about winterizing. When should we do it? How should we do it? As much as we hate saying goodbye to our Woods for the season, we inevitably have to wrap it up. Here are some quick tips for using an air compressor (the easiest way to winterize your camper).

1. Disconnect your rig from the outside water source.
2. Turn off all power in the rig. Don't forget to shut off the propane as well.
3. Bypass your water heater. You do not want to drain the water heater at this time. Some RVs come with a factory-installed bypass valve. If yours doesn't, you can install a cheap kit.
4. Consult with the owner's manuals for your refrigerator, ice maker, washing machine and dishwasher (if so equipped) for winterizing instructions.
5. Open all faucets, including tub and shower and the outdoor shower if you have one. Then open the system drain valves and let the water empty. See your owner's manual for valve locations.
6. Flush the toilet to clear any water from the line.
7. Connect the "blow out plug" to the city water inlet—not the fresh water tank.
8. Adjust the air compressor to no more than 30 psi to avoid damaging the water lines.
9. Connect the air compressor hose to the blow out plug. Turn on the compressor and let it run until all water is blown from the faucets and drain valves. Shut off the air compressor and disconnect the blow out plug from the water inlet.
10. Pour RV antifreeze down the drains. Do NOT use automobile antifreeze.

Happy Thanksgiving!

A Country Christmas!

A Country Christmas!

I Heard The Bells

I heard the bells on Christmas day
Their old familiar carols play,
And wild and sweet the words repeat
Of peace on earth, good will to men.

I thought how, as the day had come,
The belfries of all Christendom
Had rolled along th'unbroken song
Of peace on earth, good will to men.

And in despair I bowed my head:
'There is no peace on earth, ' I said
'For hate is strong, and mocks the
song
Of peace on earth, good will to men.'

Then pealed the bells more loud and
deep:
'God is not dead, nor doth He sleep;
The wrong shall fail, the right prevail,
With peace on earth, good will to
men.'

Till, ringing, singing on its way,
The world revolved from night to day
A voice, a chime, a chant sublime,
Of peace on earth, good will to men.

~ Henry Wadsworth Longfellow
